## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 11 October 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/11/02 has been entered.

2. Claims 107- 118 have been cancelled.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim s 126-130 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, does not provide support for " cleaning an organic coating off of a surface of semiconductor" as is now claimed in claim 127, and does not provide support for " coating of photoresists" as is now claimed in claim 126 .

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 98-106, and 119-130 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohmi et al. or Fukazawa et al. in combination with Otsuka et al. or Wada et al.

Ohmi et al. as discussed supra in paper No. 12 teach a method for cleaning a surface of a semiconductor wafer. The reference teaches the rotating, the contacting, and the removing steps as claimed. Ohmi et al. as discussed supra do not teach using the heated solution as claimed.

Fukazawa et al. as discussed supra in paper No. 8 teach a method for removing organic material from a surface of a semiconductor wafer. The reference teaches contacting the surface with an aqueous solution and an ozone, and forming the oxidation film on the surface of the wafer. The reference also teaches rinsing the surface with deionized water to remove the oxidized contaminants as claimed. See the document in general. Fukazawa et al. do not teach using heated solution as claimed.

Otsuka et al. and Wada et al. as discussed supra in paper No. 12 teach the heated solution as claimed.

Art Unit: 1746

It would have been obvious for one skilled in the art to use the heated solution and the temperature taught by Otsuka et al. or Wada et al. in the Ohmi et al. or Fukazawa et al. process to increase the reaction and to improve the cleaning process.
